

UNUSUAL ATTITUDES & SPIN AWARENESS TRAINING FOR POWER PILOTS

Power pilots - if you don't feel comfortable with stalls, if you've never experienced a spin, or if you would like a stall/spin refresher, this is the training for you!

The goal of this training is to teach the pilot how to feel more comfortable with stall entries and recoveries, to demonstrate proper control input technique for stall/spin recovery, to help you identify the signs of a stall/spin, and to know how to identify and avoid the chain of events that lead up to the classic stall/spin accident.

The spin awareness clinic includes two flights with a certified Gliding Australia Instructor. The first flight will get you comfortable and familiar with being in a glider and will demonstrate a high AOA stall and a stall induced by low speed and near normal flying attitude. The second flight will demonstrate an incipient spin and a full spin with multiple turns from a relatively low nose attitude stimulating what happens when the pilot flies a little slow and then uses the rudder to yaw the aircraft.
